

Hospital Emergency Room Analysis Dashboard

Transforming data into actionable insights for emergency care
management

Project Purpose

Improve Efficiency

Streamline operations and optimize resource allocation in emergency care

Generate Insights

Transform raw data into meaningful patterns and trends

Support Decisions

Enable stakeholders to make informed patient management choices

Project Roadmap

Business Gatherings

Align stakeholder requirements and objectives

Understanding Data

Comprehend data sources and structures

Data Connection

Import data using Power Query

Data Cleaning

Quality check and cleansing with Power Query

Calendar Table

Create time intelligence using Power Query

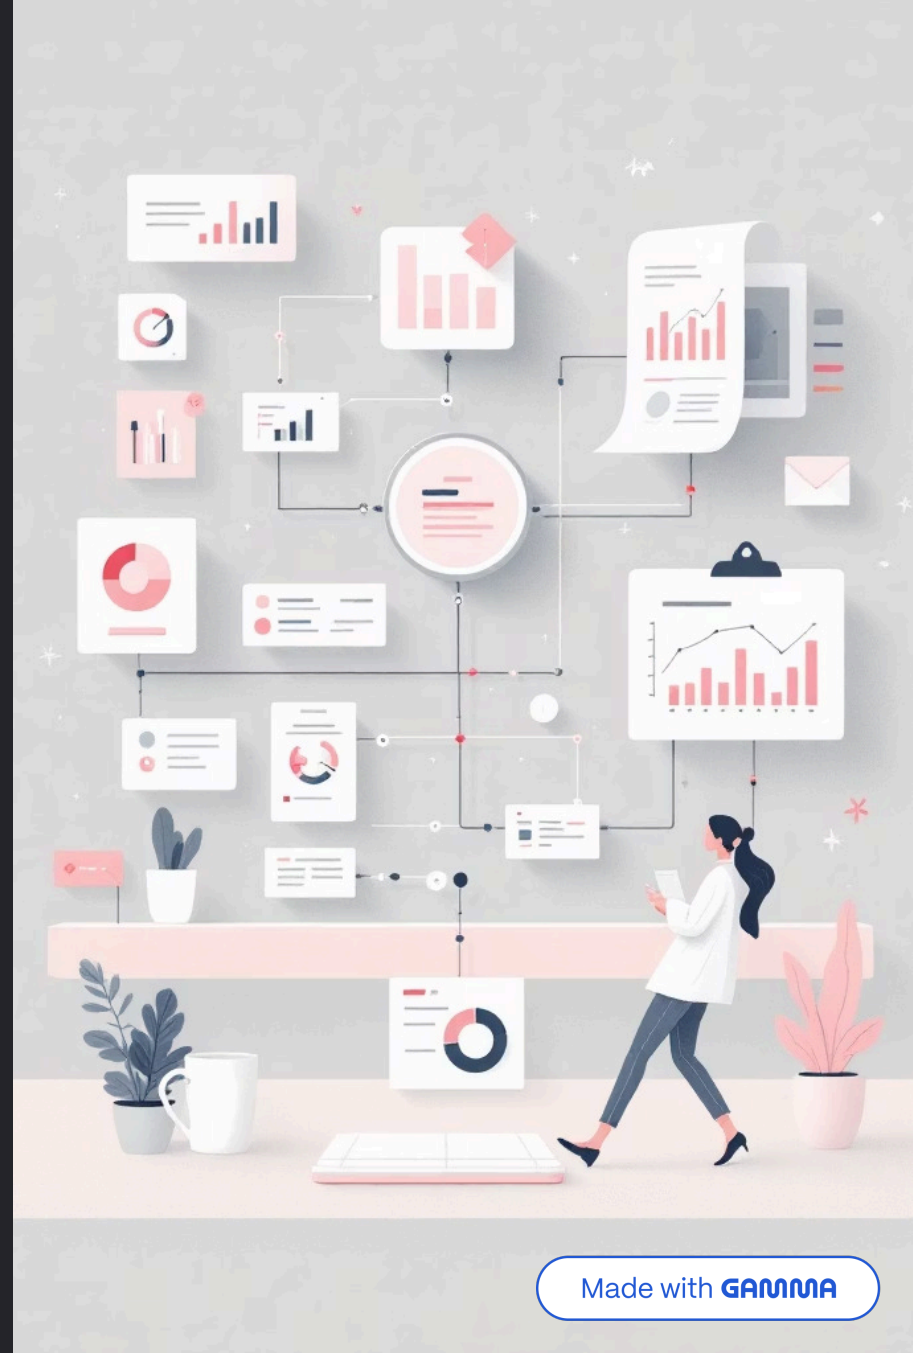

Data Foundation

Data Modeling

Build relationships and structure using **Power Pivot**

DAX Calculations

Add calculated columns and measures for advanced analytics

Dashboard Development

Pivot & Layout

Design structure and pivot tables

Charts

Develop and format visualizations

Final Dashboard

Integrate components into cohesive report

Key Benefits

Real-Time Monitoring

Track patient flow and resource utilization as it happens

Deep Analysis

Identify bottlenecks and improvement opportunities

Service Enhancement

Optimize patient care and operational efficiency

Stakeholder Value

Monitor Performance

Track key metrics and service levels in real-time

Analyze Trends

Identify patterns and root causes in patient flow

Make Better Decisions

Base resource allocation on data-driven insights

Technical Stack

Power Query

Data import, transformation,
and calendar table creation

Power Pivot

Data modeling and DAX
calculations

Excel Dashboard

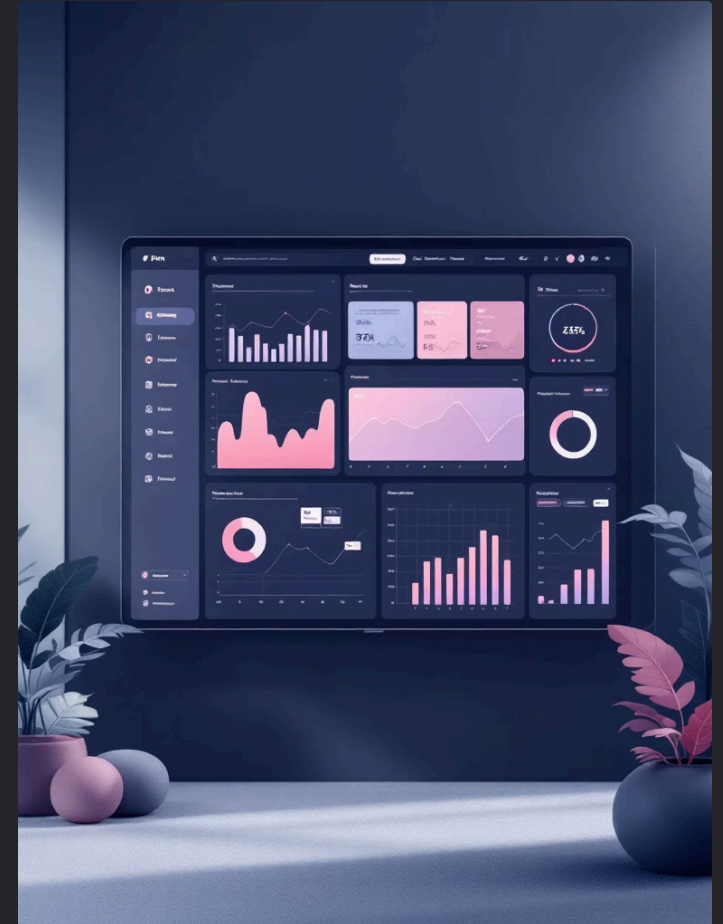

Pivot tables, charts, and interactive reporting

Insights Generation

Transform Data Into Action

Generate insights that drive operational improvements and better patient outcomes

Ready to Transform Emergency Care

A comprehensive dashboard solution that empowers stakeholders to monitor, analyze, and optimize emergency room operations through data-driven insights
